Pharmacology

covers basic and
general pharmacology,

from a cellular and
molecular perspective,
with particular

attention to the
mechanisms of drug
action - the

fundamental basis for
proper clinical use-

without neglecting
clinical application,
toxicology and
pharmacokinetics.

Pharmacology:

Principles of Drug ...

Traditionally,

pharmacology

departments have

studied the mechanism

of drug action and the

hormonal and signaling

systems that are the

targets of most drugs.

Molecular

Pharmacology at

Einstein continues this

tradition, with a strong

emphasis on signal

transduction and

hormone action at the
